## Additional Information

### What does the service include?

- (1) **Handheld service:** The device will be calibrated at the standard calibration points according to our internal work orders and defined calibration methods. The measured values were compared to the etalon who is traceable to national standard. In addition to calibration, minor repairs to the housing, probe and battery can be carried out.
- (2) **Official calibration (“Eichung”):** This calibration is typically ordered in food industry of german spoken countries. This service includes a battery replacement and an official calibration made by a gauging office. The measured values were mentioned on the test certificate called “Eichschein” only in case of ordering the 2 page version. This service is offered for TFX 422 only.
- (3) **Probe Replacement:** The probe replacement service is offered for all handhelds with pluggable probes in addition to the handheld service.

**Accredited calibration according to DIN EN ISO / IEC 17025:** Calibration according the DIN EN ISO / IEC 17025 (DAkkS) requirements.
